PHYSICAL EXAMINATION OF THE KNEE AND SHOULDER

MOHAN RADHAKRISHNA, MD FRCPC, DIP. SPORT MED. ASSOCIATE PROFESSOR, MCGILL UNIVERSITY

CONFLICTS OF INTEREST

None

OBJECTIVES

By the end of this lecture participants will be able to:

- Outline an approach to the examination of a peripheral joint.
- Describe how to examine the knee and shoulder.
- Perform a functional assessment of the knee and shoulder.

APPROACH TO ALL PERIPHERAL JOINTS

INSPECTION

RANGE OF MOTION

PALPATION

SPECIAL TESTS

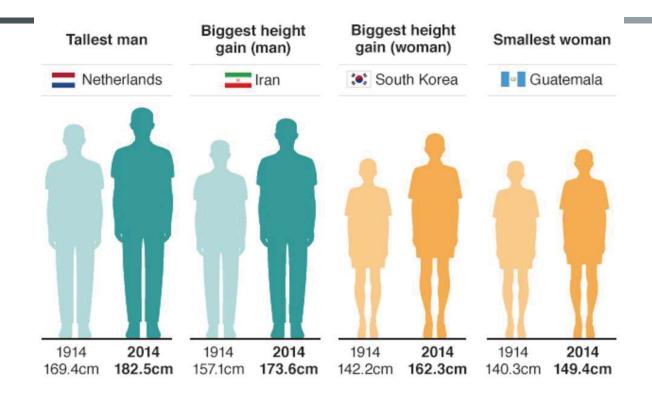

REMEMBER TO
COMPARE TO THE
ASYMPTOMATIC SIDE

THE MSK PARADOX

3

 Despite being the most prevalent pathology that people have when presenting to a physician (Mayo Clinic Proceeding 2013)

- Physicians are not confident in the MSK assessment
- Glazier RH, Dalby DM, Badley EM, et al. Determinants of physician confidence in the primary care management of musculoskeletal disorders. The Journal of Rheumatology. 1996 Feb;23(2):351-356.
- A global perspective on the challenges and opportunities in learning about rheumatic and musculoskeletal diseases in undergraduate medical education. <u>Clinical</u>
 <u>Rheumatology</u> volume 39, pages627–642(2020)

IN THESE SCENARIOS

- Inseparable from the history
- Artificial splitting of a peripheral joint from the remainder of the exam
- Include neurovascular assessment
- Evaluation of joints above and below

PEARLS

- Consider pre-test probability
- Remember not to hang your hat on one finding
- Consider the sensitivity and specificity of individual tests
- Eg McMurray has poor sensitivity compared to Thessaly

THE VIRTUAL PHYSICAL EXAMINATION

- Adequate lighting
- Appropriate camera and angle, consider headphones
- Excellent internet connection
- Ideally someone with the patient to position the camera
- Consent of patient, recording
